Senior Java Backend Developer

Senior Java Backend Developer with 4+ years of experience building Spring Boot microservices and leading enterprise legacy migrations. Proficient in AI-assisted code modernization using GitHub Copilot and custom skill files to transform Struts to Spring MVC. Skilled in FinTech payments, Keycloak security (OAuth 2.0/OIDC), and cloud deployments across GCP and Azure using Tekton CI/CD pipelines, Red Hat OpenShift, and Azure Kubernetes Service (AKS)

WORK EXPERIENCE

Deloitte • Chennai, India

02/2026 – Present

Consultant • Full-time

- **Modernized legacy Struts application to Spring MVC microservices** for a major automotive client using GitHub Copilot and custom skill files, accelerating code transformation speed by **35%** while maintaining zero regression.
- **Built automated drift matrix tools and output comparison assets**, increasing migration accuracy to **99.2%** functional parity across transformed services.
- **Engineered Tekton CI/CD automation pipelines** for containerized microservice deployments on OpenShift within Google Cloud Platform (GCP), reducing build-to-deployment cycle times by **40%**.

Prodiان Infotech • Chennai, India

11/2024 – 01/2026

Software Engineer • Full-time

- **Maintained high-throughput Spring Boot microservices** processing cross-border payment workflows (Square, MyFatoorah) with a **99.9%** transaction success rate.
- **Integrated Keycloak identity governance** for centralized OAuth2 SSO and Role-Based Access Control (RBAC), managing secure authorization across **2** microservices.
- **Containerized microservices using Azure Kubernetes Service (AKS)** and Docker, while diagnosing latency bottlenecks with Dynatrace to improve overall application throughput by **25%**.

Sumanas technologies • Madurai, India

01/2022 – 10/2024

Software Developer • Full-time

SKILLS

Languages & Frameworks

- Java (8/11/17)
- jQuery
- ReactJS
- RESTful & SOAP APIs
- Spring Boot
- Spring MVC
- Struts

Cloud & DevOps

- Azure
- Azure Kubernetes Service (AKS)
- Docker
- Google Cloud Platform (GCP)
- OpenShift
- Tekton CI/CD

Security & Authentication

- JSON Web Tokens (JWT)
- Keycloak
- Mutual TLS (mTLS)
- OAuth 2.0
- OpenID Connect (OIDC)
- Role-Based Access Control (RBAC)

Databases & Caching

- MySQL
- Oracle
- PostgreSQL
- Redis

- **Architected Spring Boot backend services** integrated with 5+ payment gateways (Razorpay, BillDesk, PhonePe) and Shiprocket APIs, handling **10,000+** monthly transactions.
- **Engineered real-time search functionality** using Elasticsearch, Typesense, and MobileNet models, cutting average data query response times down to **<150ms**.
- **Optimized backend system performance** by executing Apache JMeter stress testing and implementing Redis caching strategies, reducing database load by **30%** under peak traffic.

AWARDS & SCHOLARSHIPS

Gem of the Month
11/2024

Sumanas Technologies

PROJECTS

Automotive Struts-to-MVC AI Migration
02/2026 - Present

Deloitte

Spearheaded the refactoring of legacy Struts architectures into modern Spring MVC microservices using GitHub Copilot and custom skill files. Created automated drift matrix tools and code-comparison assets to ensure functional parity. Built Tekton CI/CD pipelines to containerize and deploy microservices on OpenShift within Google Cloud Platform (GCP).

Magnati Middleware Layer (FinTech)
05/2025 - 01/2026

Prodian Infotech

Engineered RESTful and SOAP APIs using Java Spring Boot to connect backend platforms with PostgreSQL databases. Enforced enterprise security by setting up Azure API Management and mutual TLS (mTLS) for protected service-to-service communication. Containerized and deployed services on Azure Kubernetes Service (AKS)

FlexCap Pro (FinTech)
11/2024 - 05/2025

Prodian Infotech

Integrated Keycloak identity management for centralized OAuth2 authentication across distributed Java Spring Boot microservices. Implemented MyFatoorah payment gateway integration for encrypted transaction processing. Documented APIs with Swagger (OpenAPI) and introduced Redis caching strategies to optimize backend system throughput

B2C E-Commerce Platform
01/2022 - 10/2024

Sumanas Technologies

Integrated multi-gateway payment processing (Razorpay, BillDesk, CCAvenue, PhonePe) and Shiprocket logistics APIs for backend order routing. Developed dynamic ReactJS UI components and established audit logging mechanisms for user activity tracking. Automated end-to-end testing with TestCafeJS and JUnit to increase code coverage

Integrations & FinTech

- BillDesk
- CCAvenue
- MyFatoorah
- PhonePe
- Razorpay
- Shiprocket
- Square

Monitoring, Search & Testing

- Apache JMeter
- Dynatrace
- Elasticsearch
- JUnit
- MobileNet
- Swagger (OpenAPI)
- TestCafeJS
- Typesense

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Anna University
Dindigul, Tamil Nadu, India
08/2016 - 10/2020

Studied fundamentals in software engineering, cloud technologies, computer hardware/software, and computing ethics.
